NHBA Analyst Meeting 10/18

- R Shiny Update
- Downloading RStudio
- Git Updates
    - Datasets now in Git
    - Cloning repository
    - Pushing/merge conflicts
- Required Tasks
    - ALEX - Merge Spring Datasets (REQUIRED -> Possibly by Tuesday)
        - For spring datasets, join all Durham datasets so that they follow same format as Chapel Hill and Jordan Lake datasets
        - Convert datasets to csv files and write them to git
    - JOEL - Clean All Datasets
        - Ensure all datasets follow same format
        - Clean NA values and untidy variable names
        - Make sure data is clean, ready to analyze
    - SABRINA - Visualize Data (Creative Liberty)
        - Create 5+ visualizations for data of your choice (can use any dataset or subset, just make sure you document it)
        - Learn how to create plots suitable for project
        - Write a bit of analysis about your findings
- Upcoming Meetings
    - Tuesday with Client (Possible)
        - Will update by tomorrow (have to email Jin)
    - Next Sunday (New tasks assigned, will start visualizing and possibly modeling)
