NHBA Analyst Meeting 11/1

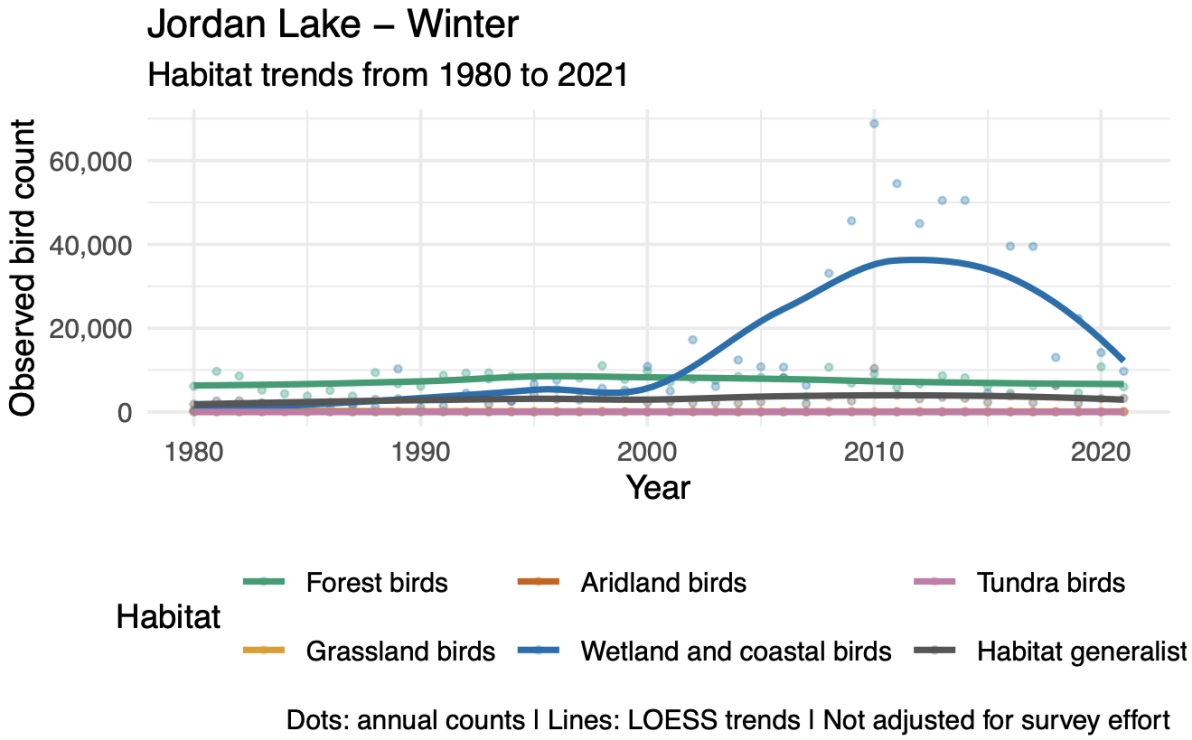

Final Deliverable Outline: [Google Doc]

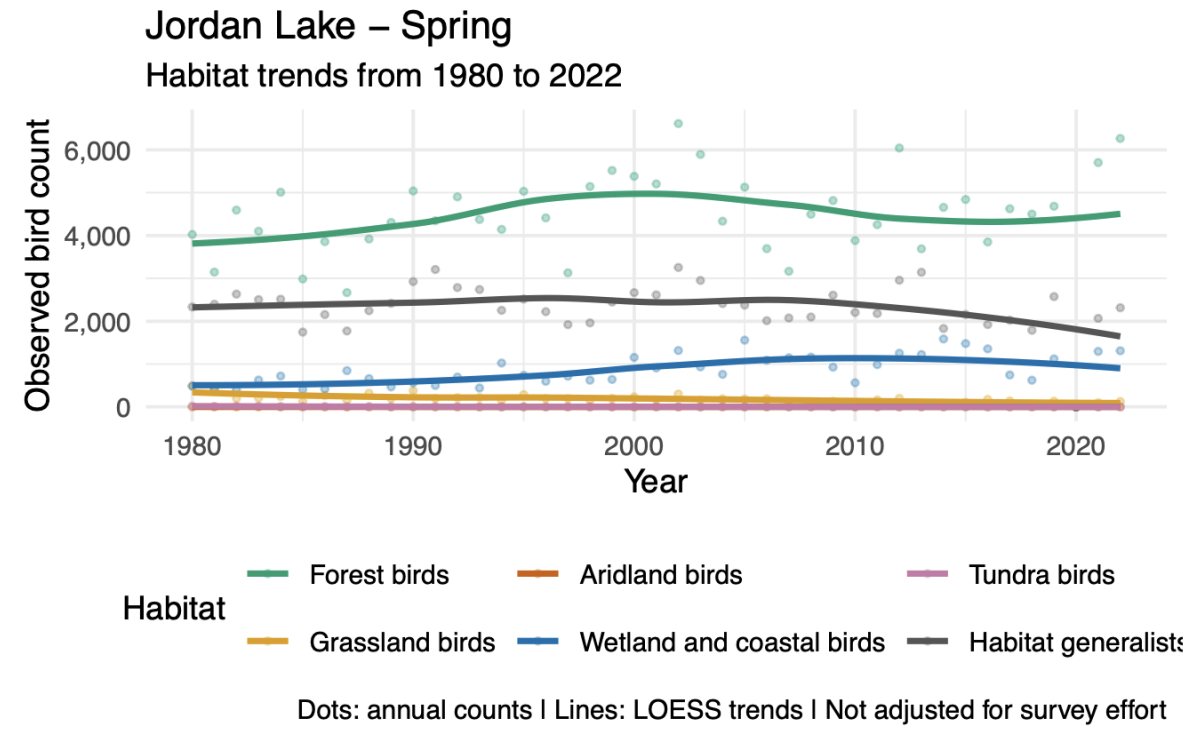

Required Tasks:

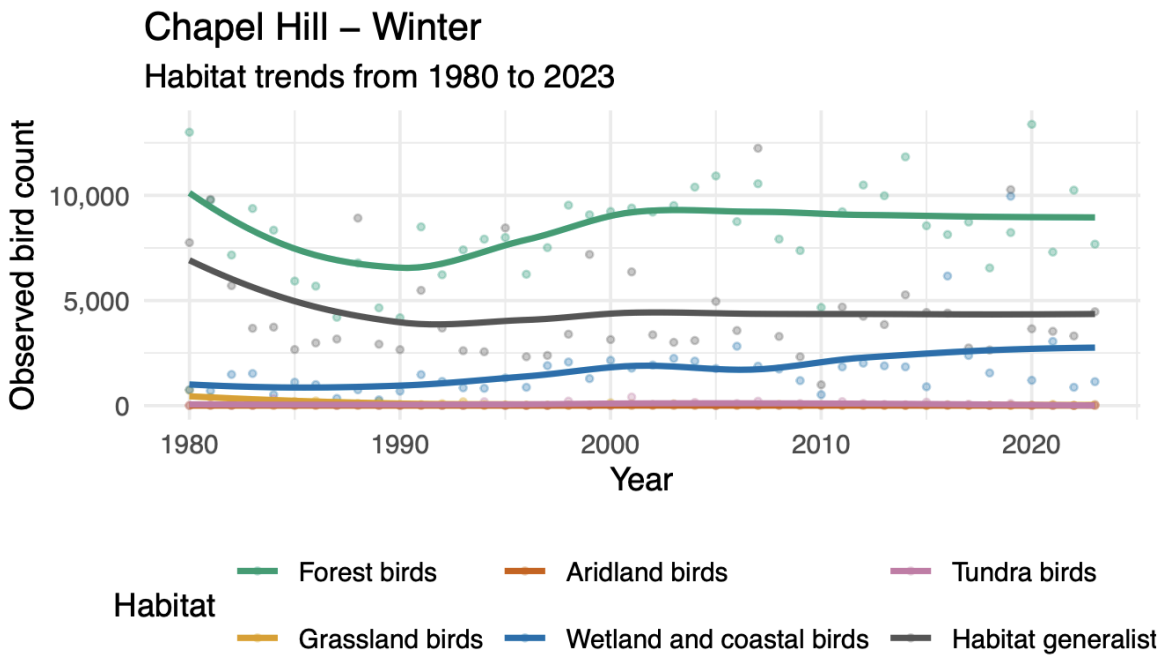

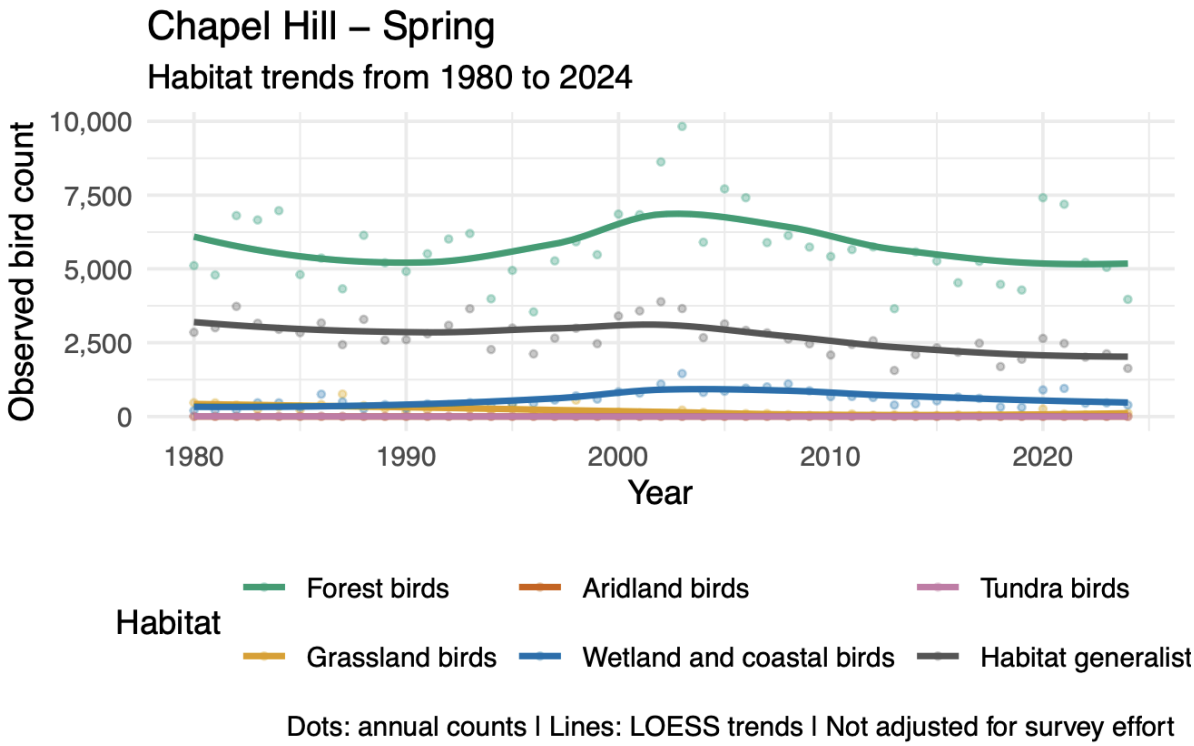

Link to reference: https://www.science.org/doi/10.1126/science.aaw1313

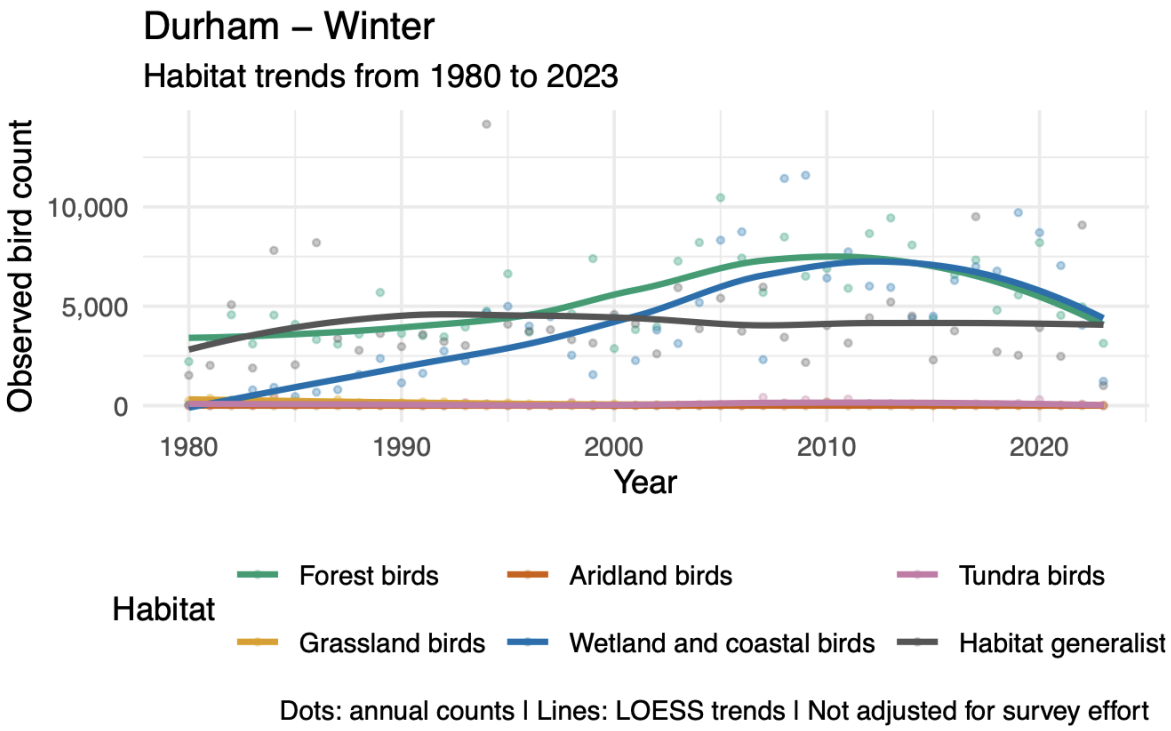

- Current Progress
  - ALEX: Finished trendline plots
  - SABRINA: made html app for species trends
  - JOEL: started background for report
- Tasks for This Week
  - Work on the report?
  - Will wait to see what Jin has to say (tasks won't be assigned til Tuesday night)
- Upcoming Meetings
  - Tuesday, 11/10 5:30 PM with Jin (if you can make it)
  - Next Sunday, 11/15

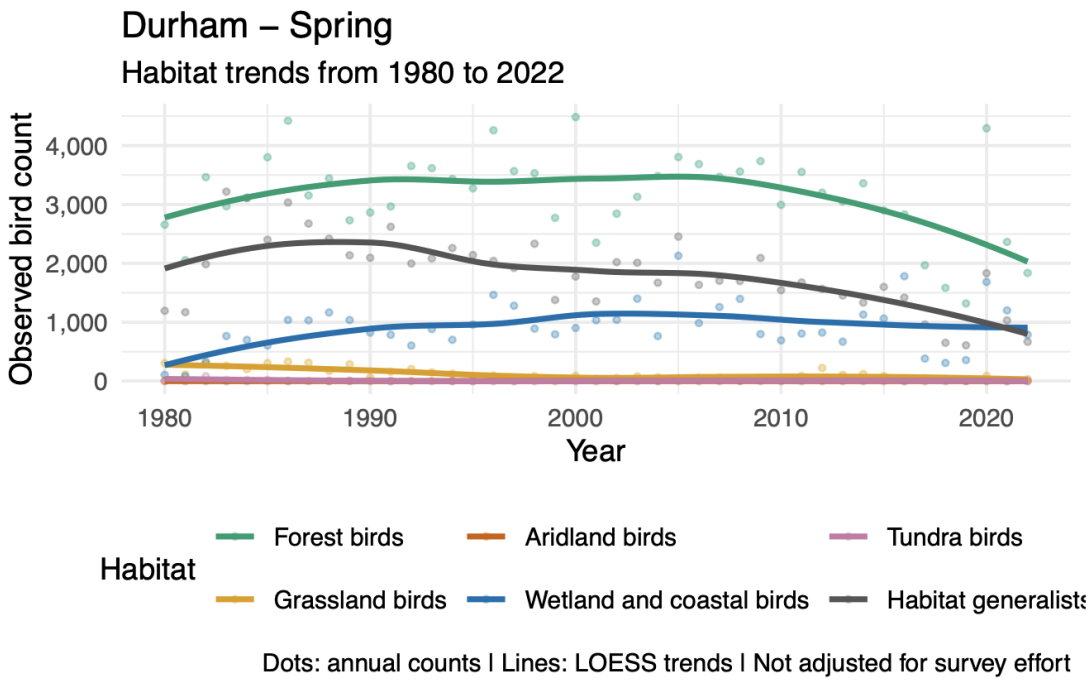

Jordan Lake – Winter
Habitat trends from 1980 to 2021
Observed bird count
60,000
40,000
20,000
0
1980
1990
2000
2010
2020
Year
Habitat
Forest birds
Aridland birds
Tundra birds
Grassland birds
Wetland and coastal birds
Habitat generalist
Dots: annual counts | Lines: LOESS trends | Not adjusted for survey effort

Jordan Lake – Spring
Habitat trends from 1980 to 2022
Observed bird count
6,000
4,000
2,000
0
1980
1990
2000
2010
2020
Year
Habitat
Forest birds
Aridland birds
Tundra birds
Grassland birds
Wetland and coastal birds
Habitat generalists
Dots: annual counts | Lines: LOESS trends | Not adjusted for survey effort

Chapel Hill – Winter
Habitat trends from 1980 to 2023
Observed bird count
10,000
5,000
0
1980
1990
2000
2010
2020
Year
Habitat
Forest birds
